

ABSTRACT

5 A combination for administration to a mammal
which combination employs a therapeutically effective
amount of a medicinal and/or therapeutic agent to treat a
disease or condition and an amount of hyaluronic acid
and/or salts thereof and/or homologues, analogues,
10 derivatives, complexes, esters, fragments and subunits of
hyaluronic acid sufficient to facilitate the agent's
penetration through the tissue (including scar tissue) at
the site to be treated, through the cell membranes into the
individual cells to be treated.
